

USDA 2007 FARM BILL FORUM in NEBRASKA

Sept. 15, 2005

Please respond to the following six questions. Space permits (below or reverse side) to respond, or add your own comments about other 2007 farm bill suggestions.

- 1) How should farm policy address any unintended consequences and ensure that such consequences do not discourage new farmers/ranchers and the next generation of farmers/ranchers from entering production agriculture? You ~~should~~ just stopped them by opening the canadian border to live beef and not stopping boxed beef trade.

You should have opened CRP in a three year ^{rotation} or partial usage with incentives for purchasing or leasing to new farms/rancher or existing farms/rancher. Lets raise that beef and feed here in USA.

- 2) How should farm policy be designed to maximize U.S. competitiveness and our country's ability to effectively compete in global markets? It appears to me global markets favor the Multinationals. Leasing producers little reward. Agem multinationals with all those tax breaks ~~do~~ handle both exports and imports globally. I'm concerned no imports and we don't need exports. Globalization is powerfull institutions wanting more power and money.

3) How should farm policy be designed to effectively and fairly distribute assistance to producers? Non corporate family farmers need a special account free of taxation in or out of this account. All profitable years you add to account. Any disaster weather, market, fire or hail can come from this personal special account. No need for your gov. contaminated funds!

- 4) How can farm policy best achieve conservation and environmental goals?

Stop all fed. farm moneys when not in compliance ~~for~~ with zero eligibility for each and ~~every~~ every year not in compliance.

- 5) How can Federal rural and farm programs provide effective assistance in rural areas?

Forget about rural areas you dont care about them! ^{LB 775} ~~NEB~~ Advantage with all the fed. + STATE tax exemption to ~~All~~ Multinationals (Walmart, IBM, Swift, Cargill, etc.) rural is guaranteed to shrink to nothing.

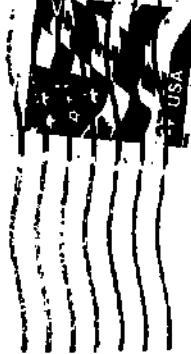

Put some teeth in payment limitations.

- 6) How should agricultural product development, marketing and research-related issues be addressed in the next farm bill?

No tech fee to chem. compangys. They ^{don't} enforce them on those foreigners.

The public is welcome to submit their comments via the USDA Farm Bill Forums website at <http://www.usda.gov/farmbill> or by mailing comments to Secretary of Agriculture Mike Johanns, Farm Bill, 1400 Independence Avenue, SW, Washington D.C. 20250-3355. Comments should be submitted by Dec. 30, 2005.
